

# 12v lithium battery pack protection board price

What is a Protection Board in a lithium battery?

This device is usually the PTC, and this component includes a protection board with electronics circuits. The voltage that the battery core should be at an environment of -40 degrees to +85 degrees when charging and discharging the battery. Protection board principle of the lithium battery

Which lithium-ion battery protection circuit board is best?

Lithium-ion battery protection circuit boards have different circuits and parameters according to different ICs, voltages, etc. The commonly used protection ICs are 8261, DW01+, CS213, GEM5018, etc. Among them, Seiko's 8261 series have better accuracy and of course the price is more expensive. The latter are all produced in Taiwan.

Are LiFePO4 protection boards more cost effective?

LiFePO4 are more cost effective, so when factoring time and cost into your purchase. The protection board has various protective functions for charging and discharging, such as overcharge protection, over-discharge protection, short circuit protection and over-current protect.

What does a Protection Board do?

The protection board has various protective functions for charging and discharging, such as overcharge protection, over-discharge protection, short circuit protection and over-current protect. Choosing a protection board and applying it appropriately is vital to the longevity your batteries.

How many cells does a LiFePO4 battery support?

Supports 4 Cells- Lithium LiFePO4 - Build a high capacity LiFePO4 battery from individual cells. Up to 120 amp continuous charge or discharge current. Perfect for your high current 12v LiFePO4 battery applications. Monitor pack and cell charge level with IOS app or Android app using included Bluetooth board.

What is a deep cycle lithium ion battery?

Lithium Technology: Deep cycle lithium ion batteries have exceptional longevity since they manufacturing by LiFePO4 Cells with higher energy density, more stable performance & greater power, letting you use the battery more freely. LiFePO4 are more cost effective, so when factoring time and cost into your purchase.

6 ???&#0183; The product covers the battery assembly in series with 1 string - 32 strings, and the lithium battery protection management system with full working current within 250A.

BMS (Battery Management System) - a battery management system that is designed to monitor the status of batteries, control the process of charging / discharging the battery and protects ...
