Why is my Acer laptop charger not charging?

Check the power outlet We know this sounds simple, but before you blame your Acer laptop charger for your lack of battery power, do check the power outlet. To ensure that the power outlet is in proper working order we recommend plugging in a phone charger, or a similar, portable device that you know works when plugged into other outlets.

Why is my laptop not charging?

By carefully checking and properly securing the AC charger connections and battery, you can eliminate the most common cause of a laptop not charging. 1. Turn off your laptop and disconnect the AC Power Charger from the wall and your laptop. 2. Ensure that you're using the original AC Power Charger for your laptop.

Should I replace my laptop battery or charger?

Ultimately, if you don't see any improvements after trying all the above, then it's maybe best that you replace either the charger or battery itself. This will require contacting your laptop manufacturer and placing an order. Batteries and the chargers are not necessarily cheap, especially if it's an older system.

How do I know if my laptop battery is charging?

To verify this, connect a different charger that is suitable for your laptop and see if your battery charges with it.\* 1. If you don't have or can't borrow another charger, visit a computer repair shop and ask them to test with their own charger to see if the battery is charging. Then, if you find that the charger is the problem, buy a new charger.

Why is my laptop charging so slow?

Your battery driver is another possible source of charging problems. The battery driver manages the overall functionality of the batteries in your laptop. Keeping your battery drivers up to date is essential in ensuring optimal battery and charging performance. Check your battery driver for updates, and reset accordingly.
