

Can lithium batteries be shipped in bulk?

Lithium batteries are classed as 'Dangerous Goods', which means there are certain limitations on how they can be shipped. A charged lithium battery can, under very particular circumstances, catch fire. This means that if you ship charged lithium batteries in bulk, there's an increased risk of fire on the vehicle that is shipping them.

Can I ship lithium ion batteries abroad?

Send Products Containing Lithium Ion Batteries Abroad Safely and Securely If you need to ship products containing lithium batteries internationally then PACK & SEND can help you to package your equipment securely and ensure that the shipment is compliant with regulations wherever you are sending to.

Can lithium-ion batteries be shipped by air?

But there's good news: Lithium-ion batteries can be shipped safely by air if shippers take proper precautions. As with all hazardous goods, safely shipping lithium-ion batteries by air requires having personnel with the appropriate expertise and training and complying with strict labeling and packaging requirements.

Are lithium batteries rechargeable?

Contact your local store for more advice and information. There are two main types of lithium batteries: lithium-ion (Li-ion) batteries, which are rechargeable; and lithium metal batteries, which are non-rechargeable.

Are lithium-ion batteries safe to ship?

Shippers must follow these rules, be appropriately certified, and have the training and expertise to prepare lithium-ion batteries for safe air transport. Lithium-ion batteries must be packaged in compliance with regulations including UN3480, UN3481, and IATA-specific rules. (Picture credit: GWP Group)
