Free delivery and returns on eligible orders.

What is a Baofeng extended battery?

A Baofeng extended battery (authentic model linked below) for mission critical operations. Simply put, a high capacity extended battery could make all the difference in some situations. When radio communications might be most important, the last thing you want is a fading battery pack. Especially when recharge may not be timely, or possible.

How many Mah is a Baofeng battery?

Do not let them fool you. The real capacity of Baofeng batteries is usually 1400mAh-1800mAh and does not exceed 2200mAh, maximum 2400mAh for new Baofeng radio models like UV-82. No one can trick the physics of Li-Ion batteries; it's impossible to squeeze a larger battery into the size-limited case.

How to charge Baofeng battery?

While we need 8.2V and 0.5A for Baofeng's battery. Set the charging current: 500mA charging current may be configured by using the stock resistors: unsolder both R100 resistors and solder them in sequence like a top-roof as shown at the picture. That would make the value of 0.2 Ohm setting the desired 500 mA current.

Do Baofeng bf-f8hp radios have a rechargeable battery?

I own six Baofeng BF-F8HP radios. They each came with a 7.4 volt /2100 mAh Li-ion rechargeable battery (Model BL-5). A pair of these are used every day here at the household for comms between Mrs. J and myself. 99% of the time they're both simply receiving. Note it's the transmit time which depletes the batteries much quicker!
