

Who is a battery collector?

A person or business that collects batteries and doesn't sort or treat them need not be an ABTO or ABE but must follow the waste duty of care. If you're an ABTO or ABE and don't have an arrangement in place with a battery compliance scheme (BCS) to treat or recycle batteries, you can only act for them as a battery collector.

Who is responsible for collecting waste batteries?

According to Article 56 of the Battery Regulation, producers should be financially responsible for separately collecting waste batteries. They can appoint a producer responsibility organisation to collect the batteries on their behalf.

How do I collect waste vehicle batteries?

You must tell final holders how they can request the collection of waste vehicle batteries, for example through information on your website. The waste batteries must go to an approved battery treatment operator (ABTO) or an approved battery exporter (ABE) for treatment and recycling.

Can You Store batteries as a collector?

If you store batteries as a collector, your environmental permit will specify any storage conditions. Sorting batteries is classed as treatment. Sorting batteries is by type; portable, automotive and industrial and/or by chemistry: lead-acid, nickel-cadmium and 'other'.

How do I pay for the collection and recycling of portable batteries?

You must pay for the collection, treatment and recycling of waste portable batteries. You do this by joining a battery compliance scheme (BCS) by 15 October before the start of the compliance year (calendar year). You pay the BCS an annual fee and it takes on your duties. The BCS will: Tell your BCS within 14 days if you:
