

What happened at Otay Mesa battery energy storage?

Cal Fire on Tuesday lifted all remaining evacuation warnings for the Otay Mesa battery energy storage facility. Firefighters remain actively engaged at the facility, which caught on fire on May 15. The incident showed how hard it was to fully extinguish lithium battery fires. That's why Eden Valley residents do not want one in their neighborhood.

Are lithium-ion batteries causing a fire in New York City?

Lithium-ion batteries, found in many popular consumer products, are under scrutiny again following a massive fire this week in New York City thought to be caused by the battery that powered an electric scooter. At least seven people have been injured in a five-alarm fire in the Bronx which required the attention of 200 firefighters.

Are electric car fires a problem in Tijuana?

Rafael Carrillo, Tijuana's fire chief, said Tuesday that electric car fires are a problem for the city's firefighters. He said the partially charred hulk of the Tesla might take a couple of days to burn out completely and probably couldn't be moved until then. He said firefighters built dirt berms around the car to keep it covered in water.

What caused a five-alarm fire in the Bronx?

At least seven people have been injured in a five-alarm fire in the Bronx which required the attention of 200 firefighters. Officials believe the incident stemmed from a lithium-ion battery of a scooter found on the roof of an apartment building.

What caused the e-scooter fire in New York City?

Officials believe the incident stemmed from a lithium-ion battery of a scooter found on the roof of an apartment building. In 2022, the New York City Fire Department responded to more than 200 e-scooter and e-bike fires, which resulted in six fatalities.
