

# Benin New Energy Yuan Battery Price List

How much electricity does Benin need?

Benin's current electricity needs are estimated at 250 MW and are expected to rise to 600 MW by 2020. One of the Talon administration's long-term goals is to increase electric power generation capacity to 4,000 MW through Public-Private Partnerships and to become an exporter of surplus power to neighboring countries.

What are the opportunities in power generation in Benin?

A number of opportunities exist in power generation. As Benin seeks to both increase and diversify its electric power generation capacity, opportunities in thermal, solar, wind, and other generation technologies are increasingly attractive to potential investors.

How can Benin meet its energy needs?

Improving Benin's ability to meet its energy needs, particularly ensuring adequate access to electricity, is a critical goal of the Beninese government to support economic development and foreign investment. Benin depends on Nigeria and Ghana for the majority of its energy, and continues to suffer from insufficient supply.

What is Benin's best prospect industry sector?

Benin's government is also partnering with other donors or financial backers, including the Islamic Development Bank, to fund the construction of additional power generation capacity. This is a best prospect industry sector for this country. Includes a market overview and trade data.
