

What is a silicone rubber parallel plug?

MOCAP Silicone Rubber Parallel Plugs are stocked in many sizes to fit your specific application. Silicone rubber product pull plugs are ideal for powder coating and E-coating operations because they resist high temperatures to 600°F (316°C). Also ideal for chrome plating. Reusable in many applications.

What sizes do mocap plastic plugs fit?

MOCAP round vinyl plastic plugs are available in sizes to fit 1/4" through 1-1/4" standard threaded holes, M6 through M40 metric openings and 1/2 through 1 NPT openings. Use our vinyl plastic plugs as durable and inexpensive plugs to protect your product during assembly or shipping.

What is a plastic plug cap used for?

MOCAP provides vinyl plastic plug caps that can be used for shipping and masking applications and for thread protection. Our MCP Series of vinyl plastic plugs can protect valves, pumps, cylinders, tubing and more.

What is a flexible plastic plug?

Flexible plastic plugs compress within holes to form a snug fit that keeps dust, debris and contaminants out. Plastic plugs have a wide flange for easy install and removal. Use MOCAP plastic plug as pipe plug, hole plug, masking plug or lower cost alternative to rubber plug.

What are mocap plastic plugs used for?

Consult MOCAP's Application Advisor for assistance. MOCAP Vinyl Plastic Plugs are perfect for shipping, masking and thread protectors. Use these plastic plugs to protect valves, pumps, cylinders, tubing and other applications. Flexible plastic plugs compress within holes to form a snug fit that keeps dust, debris and contaminants out.

What are Caplugs connector caps?

Caplugs' connector caps are available in standard, conductive or static dissipative materials, providing a low-cost insurance and port protection for a variety of different connections, cable ends and fittings.
