

Changed the battery charging current is low

Why is my battery not charging?

If your battery is charging, this issue may be caused by the battery charge threshold. You can try Fix 2 to resolve this issue. If your battery is not charging, maybe this issue is caused by a bad battery or perhaps your AC adapter malfunctions. 3) If possible, use a new AC adapter to charge your battery. See if this issue persists.

Is it normal for battery capacity to decrease over time?

Although it is normal for battery capacity to decrease over time, I would run a 'manual' calibration. By that I mean let your battery drain right down until it is no longer capable of powering your laptop. Then plug in the power lead and let the battery fully charge to maximum (without using the computer). So, plug it in until it charges 100%.

How to fix battery not charging problem Windows 10?

To see if Windows can fix the battery not charging problem, you can run the power troubleshooter. 1. In the search type "troubleshoot settings" and then click to open them from the search results. 2. In the 'Troubleshoot' window, select Additional troubleshooters. 3. Scroll down and click on Power.

Why is my laptop not charging?

By carefully checking and properly securing the AC charger connections and battery, you can eliminate the most common cause of a laptop not charging. 1. Turn off your laptop and disconnect the AC Power Charger from the wall and your laptop. 2. Ensure that you're using the original AC Power Charger for your laptop.

How do I Fix my laptop battery not charging?

To troubleshoot and diagnose the battery not charging problem on your laptop follow the below steps in order: Check Power Supply connections & Battery. Check Power Cable & Battery Connection.
