Are solar street lights a good idea?

Solar street lights are an effective outdoor lighting solution that uses solar energy to power LED lamps. They are designed to automatically turn on at dusk and off at dawn, saving energy and reducing costs. However, sometimes they may malfunction and turn on during the day, which defeats their purpose and wastes their battery life.

How long do solar street lamps last?

1-Solar panels are the components with the longest service life in solar street lamps and generally have a service life of more than 25 years. During use, if there is dust and fallen leaves on the surface of the components, it will affect the power generation efficiency.

What if the street light system is not in use?

When the street light system is not in use, the battery cannot be placed for a long time, and it needs to be discharged and charged regularly to keep it active. 3- Regularly inspect the working status of the street light poles. If there is any scratch that causes the anti-rust coating to fall off, it should be repaired in time.

What are solar street lights made of?

The poles of these outdoor solar street lights are made from Q235 steel hot-dip galvanised then finished with a plastic spray, and the LED luminaires are made from die-cast aluminium profiles that are corrosion resistant and can withstand a variety of harsh weather conditions for installation, including sandy and salt spray environments.

Why do solar street lights turn on during the day?

Solar street lights can sometimes turn on during the day due to various reasons, such as defective light sensors, insufficient daylight, dirty solar panels, faulty wires or damaged batteries, and water or moisture penetration. However, there are some easy ways to fix this issue and prevent it from happening again.
