

# China solar energy poverty alleviation project bidding

Can solar power help reduce poverty in China?

Solar photovoltaic (PV) power project, one of the major targeted poverty alleviation programs in China, has contributed greatly to the country's poverty reduction efforts, according to a white paper released by the State Council Information Office on April 6.

What is Qinghai's solar power poverty alleviation project?

Covering 66.7 hectares (0.667 kilometers), it is one of the 31 projects helping villages shake off poverty by taking advantage of photovoltaic. Qinghai's solar power poverty alleviation projects have an installed capacity of 730,000 kilowatts of photovoltaic power, and are expected to generate 570 million yuan.

What is photovoltaic poverty alleviation (PVPA)?

Photovoltaic Poverty Alleviation (PVPA) projects, which utilize the subsidies and income from PV power to alleviate poverty in rural areas, are part of a comprehensive energy policy innovation in China. It is expected that the projects will deploy at least 10GW PV and benefit more than two million poor households in total by 2020.

Who is working on PV poverty alleviation project?

Work program on implementation of PV poverty alleviation project; 2014. National Development and Reform Commission, State Council of the People's Republic of China, National Energy Administration of the People's Republic of China, China Development Bank, Agricultural Development Bank of China.

What is solar energy for Poverty Alleviation (SEPAP)?

The solar energy for poverty alleviation programme (SEPAP), which is positioned as an integral component of China's political campaign to eradicate poverty by 2020, aims to add over 10GW capacity and benefit more than 2 million households from around 35,000 villages across the country by 2020.

Can solar power help a poor village in China?

Qinghai province is one of the examples in China where impoverished villages have been pulled out of poverty by launching solar power projects. Yangjiashan village in Ledu district of Haidong city, Qinghai province, has installed more than 100,000 solar panels on top of the mountains to generate power.
