

How much does the Czech government pay for solar panels?

Thousands of households, small businesses and international investors took out loans to install solar panels that are in many cases still being repaid. The government pays about EUR1bn to EUR1.2bn in subsidy support annually, according to the Czech Solar Association.

Will the Czech Republic invest in solar power?

The Czech Republic will have hard time looking for someone willing to invest in the sector," the Czech Solar Association Chairman Jan Krčmar said. Majority state-owned electricity producer CEZ (CEZ.PR) plans to invest \$4.15 billion - four times its 2020 profit - into building 6 gigawatt of solar power capacity by 2030.

What is solar power plant subsidy & Sristi scheme?

This concept of solar power plant subsidy will form the basis of the revised scheme of MNRE to implement solar rooftop projects in Phase II. Moreover, CCEA note which was submitted earlier to the Union Cabinet in April will get replaced by this SRISTI Scheme.

Should the Czech solar sector be financed by the European Commission?

The Czech government has defended the draft law, arguing that the cost of financing the solar sector should not excessively burden taxpayers and should be brought down in line with the country's budgetary constraints. The European Commission said that it was monitoring the Czech decision and had been in touch with the parties involved.

Is Czech energy de-incentivise a warning to investors?

Despite lagging behind its neighbours, the country's recent move to further de-incentivise investment in renewable energy "is a warning to investors to take their money elsewhere", said Jan Krčmar, executive director of the Czech Solar Association.
