

What is a dual action machine polisher?

Dual action machine polishers generate a lot less heat than standard rotary polishers, yet generate more action than hand buffing with a pad and microfibre towel, which means a lot of the method that professionals use is integrated into the machine.

Are rotary polishers better than dual action polishers?

In the polishing industry, rotary types are mainly used by professionals. They're the most vigorous, and detailers will often have their own method to get the best out of them. Dual Action machine polishers are better for beginners because it's far harder to burn paintwork or do any damage.

What is the difference between a dual action pad and a head?

Dual action ones are slightly different: instead, they spin in a kind of orbital manner. The backing pad spins on top of the spindle, which spins in a wider circulating motion, while the head spins in a concentric motion. You have to picture the spindle as a common axis, like how the Earth rotates, but with the pad having more flexibility.

Does b02po49-2 gb-kit1 require batteries?

Automotive 12 Volts 2.88 Watts BATOCA B02PO49-2-GB 40 x 13 x 13 cm; 3.02 kg 2 12V batteries required. (included) B02PO49-2-GB-KIT1 Batteries included? Yes Batteries Required? Yes Lithium Ion 3.02 kg

What is a 5.0 Ah lithium battery?

5.0 Ah lithium battery uses the latest battery technology to power the powerful motor and extend the run time significantly. To ensure the safety of use, we have incorporated a soft start function to prevent the polish from splashing due to the rapid increase in speed when starting at the push of a button.

How long does a fully charged battery last?

A fully charged battery lasts about two hours. It takes about two and a half hours to fully charge the battery. 5.0 Ah lithium battery uses the latest battery technology to power the powerful motor and extend the run time significantly.

The speed of your dual action polishing machine will be another important factor. Most quality dual action car polishers will have a variable speed control ranging ...
