

How many battery cabinets can be supplied for an EPS 6000?

Contact your MGE dealer for complete information. Up to a maximum of four battery cabinets can be supplied for a single EPS 6000 UPS module, making additional back-up time available during power outages. An input harmonic current filter is available for the EPS 6000 UPS. For some power levels, the input filter is installed within the UPS enclosure.

What should I do if I don't use the EPS power unit?

If you do not intend to use the EPS Power Unit for a prolonged period of time, it must be switched off and kept in a safe place. We also recommend checking the battery charge level and fully charging the battery approximately once every six months. Page 7 o Always disconnect the EPS battery charger from the mains socket when not in use.

How often should I charge my EPS power unit?

We also recommend checking the battery charge level and fully charging the battery approximately once every six months. Battery lifetime depends on a number of different factors, such as usage and storage conditions. Note that if the EPS Power Unit is stored in excessively cold or hot conditions, battery performance and lifespan may be reduced.

How do I set up my EPs?

How you choose to set up your EPS along with the appropriate settings will depend mainly on: 1) The circuits you need/want to be powered in the event of a power cut. 2) The amount of a battery "buffer" you need/want to keep in reserve to provide backup power when needed. I will cover the following topics in this article.

Why is battery important for EPS power supply?

Battery is the energy source for EPS emergency power supply during emergency power supply, and it is a key component that affects the reliability of EPS power supply. At present, almost all EPS use maintenance-free valve-regulated lead-acid batteries.

How to clean EPS power unit?

Use only water and neutral detergent to clean the EPS Power Unit. Do not use alcohol, acetone or solvents. In order to dispose of the EPS Power Unit correctly, comply with the applicable legislation in the country of use. **IMPORTANT!** Use only water and neutral detergent to clean the EPS Interface Unit. Do not use alcohol, acetone or solvents.
