

Terms & Conditions. Important Notice. By selecting "Professional Investor", you affirm either that you are a Per Se Professional Client, or that you wish to be treated as an Elective Professional ...

The exhibition also covers various areas, including energy storage technology and materials, energy storage equipment and components, energy storage systems and EPC engineering, ...

The European Commission "Recommendation on Energy Storage" provides the strongest push for the deployment of energy storage until now. It contains concrete recommendations to help ...

Many European energy-storage markets are growing strongly, with 2.8 GW (3.3 GWh) of utility-scale energy storage newly deployed in 2022, giving an estimated total of more than 9 GWh. ...

The Commission has published today a series of recommendations on energy storage, with concrete actions that EU countries can take to ensure its greater deployment. ...

The International Energy Agency (IEA) said last month that grid-scale energy storage is now the fastest-growing of all energy technologies. It estimates that 80 gigawatts of ...

Flexibility of energy supply and demand becomes increasingly important with increasing shares of intermittent renewable electricity generation. Energy storage is one of the ...

Six Energy Storage Companies Driving The European Market: Northvolt. Founded in 2016 and based in Stockholm, Sweden, Northvolt is an operator of lithium-ion battery plants intended to ...

The main energy storage method in the EU is by far "pumped hydro" storage, but battery storage projects are rising. A variety of new technologies to store energy are also ...

On 12 September 2023, the European Parliament voted to significantly raise the EU's renewable energy ambition, setting a new legally binding 2030 target of having ...

The Cyprus Recovery and Resilience Plan will lead to the establishment of a regulatory framework for promoting the participation of storage facilities in the electricity market.

In this blog, WisdomTree's energy transition industry expert partners, Wood Mackenzie, discuss why the energy transition megatrend is poised for a renaissance in 2024. ...

The International Energy Agency (IEA) said last month that grid-scale energy ...

As the leading benchmark provider for lithium and cobalt, we deliver a mine-to-market outlook of the energy storage industry backed by battery raw material pricing data and proprietary cost models. Our existing clients include ESS cell ...

The United Kingdom is forecast to be the undisputable European leader in grid-scale energy storage capacity additions until 2030, with Spain, Germany, and Italy poised to ...

The three objectives can be summarised as: The first objective of this study is to provide a picture of the European energy storage environment, in terms of (i) existing facilities ...

The Commission adopted in March 2023 a list of recommendations to ensure greater deployment of energy storage, accompanied by a staff working document, providing an outlook of the EU's ...

Energy storage is by no means a new topic of discussion, but its importance in the renewable energy mix seems to be growing year-on-year. Menu; Topics. ... On 18 October ...

Investment in research is key in driving innovation in storage sector. EASE, as the voice of the energy storage industry, is an active contributor of the design of upcoming funding ...

The United Kingdom is forecast to be the undisputable European leader in grid-scale energy storage capacity additions until 2030, with Spain, Germany, and Italy poised to be leading the...
