

Clarke Energy is making significant progress on the 40MWh Field Newport battery storage site in South Wales, with an expected operational date in the third quarter of 2024. This significant ...

Field builds and operates large batteries which store energy to help create a greener, more stable electricity grid. We'd like to build one of these batteries, Field Fyrish, on land south of Fyrish ...

Battery energy storage systems are going to be a key part of reducing carbon emissions from electricity usage, and over time, lowering electricity bills as well. Hopefully, this ...

Field acquired the 200 MW/800 MWh Hartmoor battery storage project from leading independent developer, Clearstone Energy. The project becomes the latest addition to ...

Clearstone Energy is developing the large-scale renewable energy generation and battery storage sites needed to deliver a cleaner, lower cost and more secure UK energy system. Our sites ...

Field has today announced the acquisition of the 200 MW / 800 MWh Hartmoor battery storage ...

Battery electricity storage is a key technology in the world's transition to a sustainable energy system. Battery systems can support a wide range of services needed for the transition, from ...

Renewable infrastructure developer Field Energy has acquired 200MW Hartmoor battery storage project from Clearstone Energy, expanding its 11 GW of battery ...

that Field is undertaking in renewable energy and energy storage, as well as encouraging and equipping young people to explore careers in STEM and renewable energy. The Field team ...

Battery storage will create a more reliable, flexible and greener energy system that provides greater energy security and helps countries across Europe move on from ...

Field has today announced the acquisition of the 200 MW / 800 MWh Hartmoor battery storage project from leading independent developer, Clearstone Energy. The project becomes the ...

GE worked with us to create a fully integrated energy storage solution that helps meet the growing needs of the local transmission system. The project utilizes reliable GE equipment and ...

Field has today announced the acquisition of the 200 MW / 800 MWh MWh ...

Founded in 2021, Field is dedicated to building the renewable energy infrastructure needed to reach net zero, starting with battery storage. Field's first battery ...

Field has today announced the acquisition of the 200 MW / 800 MWh MWh Hartmoor battery storage project from leading independent developer, Clearstone Energy. The ...

Field Hartmoor can store up to 800MWh of electricity, enough to power 500,000 homes for four hours. Since securing planning consent for Hartmoor in 2023, ...

UK grid-scale battery energy storage systems developer Field is poised to break ground at its 20-MW/40-MWh Newport battery storage project in South Wales. Image by Field ...

At Field, we're accelerating the build out of renewable energy infrastructure to reach net zero. We are starting with battery storage, storing up energy for when it's needed most to create a more ...

November 24, 2024: UK battery energy storage developer, Field, has acquired a 200MW/800MWh battery storage project in the north-east of England, from Clearstone ...

Founded in 2021, Field is dedicated to building the renewable energy infrastructure needed to reach net zero, starting with battery storage. Field's first battery storage site, in Oldham (20 MWh), commenced operations ...
