

What is a fixed energy tariff?

Fixed price energy tariffs, deals or plans (they all mean the same) are a type of gas and electricity tariff that lock in an energy cost per kilowatt hour (kWh) for a specific length of time; usually one or two years. These fixed energy deals can protect households from energy price rises. How does a fixed energy tariff work?

What is fixed energy storage?

Fixed energy storage refers to energy storage equipment installed in a fixed position, which can improve the stability and reliability of the power system. Fixed energy storage has a large storage capacity and stability, suitable for long-term operation and can meet large-scale power storage needs.

What is a fixed price energy deal?

A fixed-rate energy deal means that your gas and electric unit per kWh remains the same for the whole contract period. Most suppliers offer fixed plans of 1 year, 2-year and 3-year plan according to your budget and requirements.

How long does a fixed-rate energy deal last?

Fixed-rate deals usually last between 12 and 24 months, but they don't mean your bill will be the same each month. You lock down the price you pay per unit, but not how many units you consume. The more energy you use in a month, the more you'll pay - the same as ever. The other main type of energy deal is the standard variable-rate tariff.

What is a fixed-rate energy deal?

You can use a fixed-rate energy deal to make sure you're not at the mercy of a fluctuating market if the price per unit looks like it'll go up. Fixed-rate deals usually last between 12 and 24 months, but they don't mean your bill will be the same each month. You lock down the price you pay per unit, but not how many units you consume.

What is the difference between fixed energy storage and mobile energy storage?

Unlike mobile energy storage, which incurs transportation costs during energy transportation, fixed energy storage incurs line transportation costs during energy transportation. Among them, the investment cost covers the initial investment cost of battery energy storage and auxiliary equipment.
