

How long does a battery operated Grill rotisserie motor last?

The best of both worlds! This battery operated grill rotisserie motor will spin a perfectly balanced load up to 25 pounds for a duration of 36 hours per set of D-Cell batteries\*or with the supplied AC adapter.

What RPM does a onegrill motor use?

OneGrill motors employ a high rpm (nearly 900 rpm) motor geared down to rpm. This allows for a torque curve forgiveness for imbalanced conditions without the opportunity for motor stall. How much food can you actually put on?

What is a rotisserie motor?

This allows for other factors such as extreme temperatures or out of balance conditions. Rotisserie motors employ a shaded pole style motor paired with a gear reduction transmission. This allows for an extremely high rpm motor to provide smooth and steady operation. OneGrill motors employ a high rpm (nearly 900 rpm) motor geared down to rpm.
