

How much does a solar tube cost?

The cost for a solar tube alone ranges from \$200 to \$500+, depending on the size, brand, and model. 10-inch and 14-inch tubes are the most common sizes as they fit between standard 16"-on-center roof rafters. Choose an impact-resistant acrylic dome if you live in an area with frequent hurricanes or severe storms.

What is a solar tube?

A solar tube is a reflective metal tube that carries light from the roof through to the home's interior. The roof end has a weather-proof acrylic globe or flat glass cover. On the interior, where the tube ends and diffuses light into the room, the solar tube looks similar to recessed lighting.

How big is a solar tube?

Most solar tubes are 10 to 14 inches in diameter, though some models go up to 22 inches. A solar tube may be flexible or rigid. Rigid tubes reflect the most sunlight into the home. A 10-inch solar tube provides enough light for a space up to 200 square feet. 14-inch sun tunnels can light up to 300 square feet.

What does a solar tube look like?

On the interior, where the tube ends and diffuses light into the room, the solar tube looks similar to recessed lighting. Solar tubes are also called sun tunnels, tubular skylights, light tubes, or sun tubes. Most solar tubes are 10 to 14 inches in diameter, though some models go up to 22 inches. A solar tube may be flexible or rigid.

Where can I install a solar tube?

A skylight installer near you can typically install a solar tube. You may also find solar tube installation through roofing contractors, solar contractors, and directly through solar tube dealers. Where can you install a solar tube? Solar tubes can be installed almost anywhere you're looking to add some natural light.

How many square feet does a solar tube light a house?

Rigid tubes reflect the most sunlight into the home. A 10-inch solar tube provides enough light for a space up to 200 square feet. 14-inch sun tunnels can light up to 300 square feet. Several factors affect solar tube installation cost, including:
