

How much does electricity cost in Mexico?

Published by Statista Research Department, Jul 15, 2024 Household electricity prices in Mexico amounted to 10.8 U.S. dollar cents per kilowatt-hour in December 2023. Residential electricity prices have increased steadily in the country since the end of 2020, when they were at 8.2 U.S. dollar cents per kilowatt-hour.

How is electricity supplied to homes in Mexico?

This article describes how electricity is supplied to homes in Mexico, how to plan for electric power cuts, how to find current electricity prices, and how to pay your electricity bill. All electricity in Mexico is supplied by CFE, a colossal state-owned electric company.

How reliable is Mexico's electricity supply?

Mexico's electricity power grid has been undergoing a continual upgrade in recent years, making electricity supply here more reliable than it ever has been. Most of Mexico's electricity supply is delivered by overhead cables.

How does electricity work in Mexico?

All electricity in Mexico is supplied by CFE, a colossal state-owned electric company. Rates for domestic electricity are set by the government and include subsidies for homes that conserve energy as well as seasonal subsidies for homes in regions with very hot summers or cold winters. (See the section below for prices and bills.)

What is the cheapest energy source in Mexico?

Today, renewables are the cheapest source of power. The cost of installing and generating your own energy in Mexico has declined significantly, we have reached a point where it is cheaper to locally generate electricity using solar photovoltaic technology rather than buy it from the CFE.

How do I pay my electricity bill in Mexico?

Convenient ways to pay your electricity bill include: At any CFE automated teller. Through the CFE Contigo smartphone app if you have a Mexican bank account/card. Via online banking if you have a Mexican bank account. In cash at one of Mexico's local convenience stores.
