

How much does it cost to replace the sensor battery

How much does a tire pressure sensor replacement cost?

Professional Replacement: If you take your vehicle to a shop, the labor cost can range from \$50 to \$100 per sensor. **Sensor Replacement:** If the battery cannot be replaced separately, you may need to replace the entire tire pressure sensor, which could cost between \$50 and \$150 per sensor, including labor.

How much does a TPMS sensor battery cost?

Here are typical costs: TPMS sensor battery - \$5 to \$15 per battery. Many automotive retailers sell replacement batteries in the \$10 range. High-end batteries with longer life expectancies cost more. Labor - \$10 to \$30 per tire. Most tire shops charge around \$15 to change the battery in each TPMS sensor if you bring in just the tires/wheels.

How do I replace a TPMS sensor battery?

Here are the steps to replace a TPMS sensor battery: **Identify the TPMS Type:** Before you start, determine if your vehicle's TPMS sensor allows for battery replacement. This information can typically be found in the vehicle's manual or through a mechanic. **Remove the Tire:** The tire must be removed to access the TPMS sensor.

How much does a car sensor cost?

Vehicle model - Luxury vehicles or newer models may require more sophisticated and costly sensors, increasing the total replacement cost. **Labor costs** - If you're getting the sensor replaced at a shop, labor can add anywhere from \$50 to \$100 per sensor to the total cost.

How often should a tire pressure monitoring system battery be replaced?

Most mechanics recommend proactive battery replacement every 5-7 years as preventative maintenance to avoid more costly sensor repairs down the road. Replacing just the battery in a tire pressure monitoring system (TPMS) sensor can save money compared to replacing the entire TPMS sensor. Here are typical costs:

How do I replace a sensor battery?

Open the Sensor: If your sensor is designed to allow for battery replacement, gently open the sensor using a small screwdriver. Be cautious to avoid damaging any internal components. **Replace the Battery:** The battery is typically a small lithium-ion coin cell battery (e.g., CR2032 or CR2450).
