

# How to deal with a broken street light battery pack

How to maintain a solar street light?

Pay attention to the dust on the panel surface, clean it if necessary. In addition to the cleaning and protection of the solar panels, the battery of the solar street light must be maintained too. 1. In situation of strong wind, heavy rain, hail, heavy snow, etc., measures should be taken to protect the solar battery modules to avoid damage.

What should be done after installing solar street lights?

Therefore, after installing the solar street lights, personnel should be regularly organized to conduct detailed inspections on the solar panels in all aspects. This is also to keep the solar panels running in good working conditions for a long time, to ensure the normal use of the street lights, and to create more economic benefits.

Can a solar street light be repaired?

Actually, if there is any problem with the solar street lamp, it is best to find the manufacturer to repair it. If the warranty period has passed, then you should also look for a professional solar street light installer and maintenance personnel to check and solve the issue. Previous: City Street Lights Maintenance Issues an...

What if the street light system is not in use?

When the street light system is not in use, the battery cannot be placed for a long time, and it needs to be discharged and charged regularly to keep it active. 3- Regularly inspect the working status of the street light poles. If there is any scratch that causes the anti-rust coating to fall off, it should be repaired in time.

Are solar street lights a good investment?

Using solar street lights has many benefits, such as energy saving, environmental protection, safer and stability, and easy installation, etc. To extend the service life of solar street lights, in addition to ensuring quality during manufacturing and correct installation, follow-up maintenance is also very important.

How to replace a street lamp?

1) Make sure the street lamp lead wire is not shorted or open. 2) Check whether the lamp beads of the street lamp are burned or have dirt residue, and the street lamp should be replaced with a new one and cleaned in time. 3) The working life of the street lamp is exhausted, so replace it with a new one in time.
