

How to get the Canadian energy storage subsidy policy

Should Canada be involved in energy subsidies?

Canada, as a significant energy producer and consumer, faces complex and contentious debates regarding energy subsidies within its energy policy landscape. A strong case has been made that governments should not be involved in subsidizing energy production or consumption.

Will Canada's energy storage sector keep pace with the United States?

"The announcements in today's Federal Budget related to Clean Technology ITCs & the SREP program are critical steps to ensure Canada's energy storage sector keeps pace with the United States and the global market," said Justin Rangooni, Executive Director of Energy Storage Canada.

How can we phase out bad energy subsidies in Canada?

If we want to phase out the bad subsidies, we need to know how to identify them. The G20 agenda is not to eliminate all subsidies. It is only to eliminate the inefficient ones. Many attempts to estimate energy subsidies in Canada have not differentiated between efficient and inefficient subsidies.

What is Canada's energy policy?

Canada is an important producer of energy. And, given our geography and climate, Canadians are proportionately significant consumers of energy. Energy policy is a priority for many provincial governments and for the federal government. Several provincial governments receive substantial royalty payments from natural gas and oil extraction.

How do energy incentives work in Canada?

The federal government does not usually administer energy incentives. Instead, it provides provinces and territories funding to administer their own through the Low Carbon Economy Fund. Zero-Emission Vehicle Incentive - One notable exception is ZEV incentive offered through transport Canada.

Who is energy storage Canada?

About Energy Storage Canada: Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and represent the full value chain of energy storage opportunities in our own markets and internationally.
