

Do I need electricity / how is the bouncy castle powered?

A bouncy castle requires electricity and is powered by an electric fan. The fan needs to stay on while the bouncy castle is up. We will bring a 25m extension cable with us and it just plugs into a normal 13A plug socket.

Can I put a bouncy castle further than 25m?

If you want to place the bouncy castle more than 25m from a power outlet, please talk to us about your options. We may be able to bring a longer cable or you may need to hire a generator.

How is a bouncy castle secured?

To secure a bouncy castle, we use either pegs (for grass), thunderbolts (for tarmac/concrete), or sandbags (for indoors). After securing it, we check that you are satisfied and run through the rules of use with you. You will be asked to sign a copy of the terms and conditions while the kids can start bouncing.

How long does it take to set up a bouncy castle?

It takes 15-30 minutes to inspect, deflate, and pack away a bouncy castle. Softplay packages can take up to 45 minutes to set up. If you have any questions that have not been answered on this page, please contact us and we will be able to help you.

How do you inflate a bouncy castle?

You blow it up, either with a pump or manually then you press in a plug to hold the air inside the inflatable. It is a great way of inflating something, but doesn't work for a bouncy castle. Think about it, if you inflated your air bed to high pressure, plugged the valve then jumped on it, what would happen?

How far can a bouncy castle be from a plug socket?

If you want to place the bouncy castle more than 25m from any plug socket, please talk to us about your options. We may be able to bring a longer cable or you may need to hire a generator. Other details: The bouncy castle uses approximately £2-3 worth of electricity per day. As for the number of people, it can accommodate multiple users.
