

How do I insert a button battery?

Inserting button batteries or circle batteries is a simple process: Identify the flat (positive) side of the battery, open the battery compartment of the device, look for a sign that indicates the correct polarity and then insert the cell accordingly. You can also stack button batteries.

How do you stack a battery?

So with coin cell batteries, insert the first battery with the positive side face-up. Then, stack the second battery with the negative side facing down (and positive side facing up) so the negative side rests on top of the first battery's positive side. I have a very small cylindrical flashlight that takes 4 button batteries, stacked.

How do I choose a button battery?

Button batteries vary in size, but this advice works for all of them. The most important step when you're inserting a button battery is getting the polarity right, but this is a simple thing to ascertain. The batteries have one flat side, which is always the positive side, and a rounded side, which is the negative side.

How do you put a new battery in a laptop?

If you're ready to pop in those fresh batteries, read on! For AA, AAA, C, and D batteries, slide the flat, negative end of the battery against the spring onto the device. Then, push the raised, positive end into the flat side of the compartment. For a 9-Volt battery, hold it at a 30° angle to line it up with the connector snaps.

How do I replace a battery operated device?

Use new batteries that are meant for your battery operated device. Remove the batteries from their packaging and discard any plastic wrapping. Install the new batteries into your device. Match up the positive (+) and negative (-) markings on the batteries in the device to make sure they are installed correctly.

How do you use a 9 volt battery?

For a 9-Volt battery, hold it at a 30° angle to line it up with the connector snaps. Press it into the connectors and then push it into place. For coin or button batteries, place the positive side facing up unless otherwise directed. If you don't put the batteries in the correct way, the device will damage and it will be caused to malfunction.
