

# How to remove the iron sheet of new energy battery

How do you replace a battery?

Secure the new battery to the bracket and grease the terminals. Place the new battery in the battery tray and secure it to the bracket. Simply reverse the process you used to remove the battery from the bracket. Then, coat each of the terminals in a thin layer of lithium grease to prevent corrosion.

How to dispose of an old car battery?

Next, remove the battery and clean the terminal clamps with baking soda and a wire brush. Then, insert the new battery, and connect the positive and negative terminals. Finally, tighten the terminal clamps with a wrench and spray them with lithium grease to prevent corrosion. To learn how to properly dispose of an old car battery, keep scrolling!

How do I install a new battery?

Clean the battery tray: Before installing a new battery, clean the battery tray and remove any corrosion or residue. Rinse with clean water and dry thoroughly. When installing a new battery or reconnecting the old one, reverse the steps from above and connect the positive terminal first, followed by the negative terminal.

How do I fix a bad battery?

Reconnect the positive cable first. Undo the cable tie securing the positive cable to the engine bay, being careful not to touch the end of it to anything metal. Put the cable over the terminal and tighten it down with a wrench. Put the cover over the terminal, if the battery has one.

How do you change a car battery?

This article has been viewed 2,158,304 times. To change a car battery, pop the hood of your car and locate the battery, which will be kept on either side of the car's frame. Disconnect the negative terminal, which is labeled with a minus sign, before disconnecting the positive terminal to keep it from short-circuiting.

How do you reconnect a car battery?

To reconnect a car battery, position the new battery in the engine battery tray; re-connect the positive terminal; connect the negative terminal; check the connections; and then start the engine. Service, repair or MOT?
