Can a cracked solar panel still be generating electricity?

The cracked panel may still be generating electricity but Ben Robinson, director of Exeo Energy, advises getting it replaced as soon as possible: "This will eventually result in issues, normally as soon as moisture enters the panel". See if you can get a replacement panel under warranty. If so, Mr Robinson advises that:

Do you have problems with your solar panels?

Nearly seven in 10 owners had had no problems with their solar panels in our survey of over 2,000 owners.\* The most common - and most serious - problem owners face is with the inverter. In some cases inverter problems mean you don't get any usable renewable electricity. It can also be a pricey problem to fix.

Do you need a window cleaner to clean solar panels?

Trusted Trader Gone Solar, suggests that you get a window cleaner to clean your panels, using only water. Ben Robinson, director of Exeo Energy, advises using an experienced solar panel cleaner and only cleaning them yourself if you're very careful. "Snagging of cables and smashing of panels is possible with careless cleaners.

How does a solar power system work?

A simple system doesn't involve any re-wiring, and doesn't change any of the wiring to the rest of the house. The solar panels connect into your consumer unit as a new dedicated circuit. When the sun shines, electricity flows from the solar power system into your consumer unit. It replaces some or all of the electricity coming from the grid.

Do solar panels degrade over time?

Solar panels also degrade gradually over time. So, after a decade of ownership, your panels might produce slightly less power than they did when new. You can find the expected degradation of your panels on their datasheet (search online for it using their make and model: find this on your MCS certificate).

Do solar panels produce less power?

Less-than-perfect weather conditions are a fact of solar pv life and there's nothing you can do about it. Solar panels also degrade gradually over time. So, after a decade of ownership, your panels might produce slightly less power than they did when new.
