

Is it good to install photovoltaic solar panels on the roof of your own house

Is my roof suitable for solar panels?

If the sun sets in front of you, it's west-facing; if it sets to the left, it's north-facing; and if it sets on the opposite side of the property, it's east-facing. Here's how an installer will decide if your roof is suitable for solar panels, including assessing its direction, usable space, and loft.

Do you need planning permission to install solar panels on a flat roof?

Thanks to recent changes to permitted development rules, most installations on flat roofs won't need solar panel planning permission. So long as the panels aren't visible from the street and don't exceed 200mm above the roof, they should be covered under permitted development rights.

Can solar panels be mounted on a flat roof?

This means there are two different mounting systems to help ensure you get the best out of your solar panels on a flat roof. A mounting system is critical for solar panels on a flat roof, as by using a framing system, the panels can be tilted toward the sun, enhancing their efficiency.

Should I replace my flat roof before installing solar panels?

The majority of flat roofs are made of traditional felt, which has a lifespan of approximately 15 years. So if your flat roof is over 10 years old, it would definitely be worth replacing it before installing solar panels. The same applies if you are planning to build an extension on your home and place solar panels on the flat roof.

How much does a solar panel installation cost?

The average cost of solar panel installation on a pitched roof is around £1250 per Kw. As you can see, installation costs on flat roofs are much lower than pitched roofs. Bear in mind that these are rough estimates. Prices will depend on which mounting technique you choose and how many panels you need.

Can solar panels be used on a garage or rear extension?

The common perception is that solar panels are only suitable for a classic south-facing pitched roof, but if the roof of your home doesn't have the right orientation, can the flat roof of a garage or rear extension be just as effective? In short, the answer is yes, but there are a number of different variables to get right.

If you and your installer agree on an internal cable run, they'll feed your solar panels' DC cable through a fold in the roof's felt membrane, and into your loft. In most cases, they'll then thread the cabling through the house ...
