

How do I identify low capacity lead acid batteries?

Take seconds to identify low capacity lead acid batteries with the innovative ACT 612 Intelligent Battery Tester for 6V and 12V SLA, GEL and car batteries.

What is Act chrome battery discharge tester?

ACT/Chrome Intelligent Battery Discharge Tester with built-in Temperature Compensation can be used to accurately verify actual available capacity. The ACT CHROME 12V SLA Battery Tester uses advanced pulsed load technology to deliver accurate DC Voltage and Ah capacity results based on the battery's temperature and state of charge.

How does the Act chrome 12V SLA battery tester work?

The ACT CHROME 12V SLA Battery Tester uses advanced pulsed load technology to deliver accurate DC Voltage and Ah capacity results based on the battery's temperature and state of charge. A quick look up table on the side of the unit identifies when batteries should be recharged or replaced due to age or operating conditions (65% of rated capacity).

How do I calibrate my battery tester?

Simply turn the Ah Calibration Control to select either standby SLA, cyclic GEL and car FLOODED battery types prior to testing. The Calibration Control also allows you to calibrate the battery tester to non standard battery types. Test 6V battery models between 1.2Ah and 12Ah, and 12V battery models between 1.2Ah and 100Ah.
