

Will ICL build a lithium battery factory in North Riverfront?

The global specialty minerals company ICL is set to build a more than half-billion dollar manufacturing facility for a key component in lithium batteries in the city's North Riverfront neighborhood.

How much does ICL's new battery plant cost?

The \$400 million facility is planned to be operational by 2025 and will help meet growing demand from the energy storage, electric vehicle (EV) and clean-energy industries for U.S.-produced-and-sourced essential battery materials. ICL's investment in the plant was augmented by a \$197 million grant from the U.S. Department of Energy.

Will ICL build a phosphate plant in St Louis?

The Israeli company had previously announced that it broke ground last year on a \$400 million facility in the Carondelet neighborhood in south St. Louis, but the company learned that site would not be ideal for the project, said Phil Brown, president of food and phosphate specialties for ICL, during the board's meeting.

Are there any large-scale manufacturers of LFP batteries?

While the demand for lithium batteries continues to grow, currently there are no large-scale manufacturers of LFP material in the United States. By 2025, the share of LFP batteries is expected to reach more than 30% of all battery shipments.

How big is the Li-ion battery market by 2030?

By 2030, Cairn ERA forecasts global demand for the Li-ion battery market will reach more than 2,725 GWh, for a market value of more than \$240 billion. Phil Brown, president of Phosphate Specialties and managing director of North America for ICL.

St. Louis will be at the forefront of a massive expansion of domestic manufacturing of batteries for electric vehicles and the nation's electrical grid.
