

Manufacturers of new energy batteries made in Warsaw

Who makes EV batteries in Poland?

The plant manufactures all battery components up to the product ready for assembly in the car. LG Energy Solution Wroclaw contributes to strengthening Poland's position as a leader in the EV industry in Europe. Impact Clean Power Technology is a Polish company from Pruszkow, which has been on the market since 2007.

What is the largest battery plant in Europe?

It built the first battery production plant in Europe and the largest in the world on approximately 1,000,000 square meters of land. The LG Energy plant in Wroclaw, Poland, has an annual capacity of 86 GWh, which is enough to power approximately 1.2 million electric vehicles.

Where are our batteries manufactured?

Our batteries have surpassed all the regular battery tests and the EBS & JBS (European Battery Society & Japanese Battery Society) and we are manufactured confirming to stringent ISO 9000 standards. We have our distribution and Logistic Setup here in Warsaw Poland and are conveniently placed to distribute to any European Point under 72 hours.

Why did LG choose Poland for its EV battery production system?

For these reasons, LG Energy Solution has chosen Poland as the primary production base for its global EV battery production system. It built the first battery production plant in Europe and the largest in the world on approximately 1,000,000 square meters of land.

Where is the world's largest battery production plant located?

Since 2016, the company has operated the world's largest battery production plant in Poland to prepare for the growing electric vehicle market and to lead the European market. The company has also announced that it will increase its production capacity to 100 GWh by 2025 through further plant expansion.

Where are EV batteries made?

Utilizing our facility near Wroclaw, which is the largest EV battery manufacturing plant in Europe, we are committed to establishing a robust supply chain in Europe and accelerating the Old Continent's transition to sustainable mobility," said Seungtaek Hong, Head of Advanced Automotive Battery Marketing Department at LG Energy Solution.

LG Energy, a leading global battery maker, will supply a total of 200,000 nickel-cobalt-manganese (NCM) battery modules from its plant in Warsaw to ICPT for three years from 2024. The companies didn't reveal the
