

Ministry of Industry and Information Technology Battery Production Query System

What's new in China's Lithium-ion battery industry?

BEIJING, June 19 -- China's Ministry of Industry and Information Technology on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen standardized management and promote the high-quality development of the sector.

What will China's new lithium-ion battery regulation mean for the battery industry?

China's industrial regulator plans to launch a major document to guide the production capacity of lithium-ion batteries, which industry experts said will knock out a batch of low-end battery cells and accelerate the structural adjustment of the country's booming lithium-ion battery sector.

What will China's Lithium-ion battery production capacity be in 2025?

The China Automotive Power Battery Industry Innovation Alliance predicted that by 2025, the country's lithium-ion battery production capacity will likely exceed 3,000 GWh. However, the capacity utilization rate of the country's lithium-ion battery industry dropped to about 40 percent last year and is likely to reach 35 percent by 2025.

Should lithium-ion battery companies invest in technology?

Instead, lithium-ion battery companies will be encouraged to strengthen technological innovation, improve quality and reduce production costs. They are required to spend at least 3 percent of the revenue on R&D and technological upgrades, the draft guideline said.

BEIJING, Dec. 24 -- China's lithium-ion battery industry sustained rapid expansion in the first 10 months of 2022, official data showed. The total output of lithium-ion ...

The output topped 110 GWh in the period, and the industry's total production value exceeded 240 billion yuan (about \$37.1 billion), according to the Ministry of Industry and Information ...

A few days ago, the Ministry of Industry and Information Technology released the operation of the battery industry from January to May 2019, of which the national lithium-ion ...

From August, the Ministry of Industry and Information Technology will establish an online national information management platform to monitor and track the production, ...

[the Ministry of Industry and Information Technology issued a new version of the interim measures for the regulation and announcement of the lithium-ion battery industry] on ...

Ministry of Industry and Information Technology Battery Production Query System

Battery link, January-June energy storage lithium battery production of more than 110GWh. new energy vehicles with power lithium battery installed volume of about ...

The Ministry of Industry and Information Technology unveiled a draft guideline on Wednesday that will guide lithium-ion battery companies to reduce projects that aim solely to ...

BEIJING, June 19 -- China's Ministry of Industry and Information Technology on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen ...

Recently, the Ministry of Industry and Information Technology released the situation of the national lithium-ion battery industry in the first half of 2021, pointing out that ...

The State Council Information Office held a press conference Friday in Beijing, inviting officials from the Ministry of Industry and Information Technology to brief the media on ...

According to the inspection reference table released by the Ministry of industry and information technology for safety investigation of new energy vehicles, the main part of the ...

China's Ministry of Industry and Information Technology (MIIT) on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen ...

The industry and information technology system will work based on both domestic and international dynamics, bearing in mind the top priorities of both the CPC and the Chinese ...

Information Technology (MIIT), Ministry of Science and Technology (MOST), and National Development and Reform Commission (NDRC) jointly released A Notice on Optimizing Fiscal ...

This year, the Ministry of Industry and Information Technology has continued to implement strategies aimed at building up China's strength in manufacturing, cyberspace, and the digital ...

SMM Feb. 25: yesterday, the Ministry of Industry and Information Technology released the Operation of the Lithium Ion Battery Industry in 2021, which mentioned that the ...

Federal Minister for Industries and Production, Rana Tanveer Hussain along with Federal Minister for Information and Broadcasting, Mr. Attaullah Tarar, visited the Utility Store at Abpara Market ...

China's Ministry of Industry and Information Technology on Wednesday unveiled revised guidelines for the lithium-ion battery industry to further strengthen standardized ...

Ministry of Industry and Information Technology Battery Production Query System

Key Laboratory of Micro-Nano Optoelectronic Information System Theory and Technology Ministry of Industry and Information Technology. ... and more than 10 post-doctoral students. ...

From January to February 2022, China's lithium-ion battery industry maintained a rapid growth trend, according to enterprise information announcements and research ...
