

# New Energy Battery Assembly and Testing Worker

What is Neware in battery testing systems?

Neware is a leading battery testing system provider headquartered in Shenzhen, China. Since 1998, Neware has been committed to providing high performance battery testing systems. To date, over 170,000 sets of Neware battery testers have been installed on customer sites, and this number continues to grow significantly. Neware serves over 26,000 clients.

How much does a battery test & testing engineer make?

We are looking for engineers with expertise in Battery Validation & Testing, particularly with HV Battery Systems. This is an excellent opportunity to advance your career in one of the fastest-growing sectors. Battery Test & Validation Engineer Salary - £30k to £55k UK / EU Relocation Support: £5K (negotiable) Multiple roles also available:

What does a battery engineer do?

Conduct and document testing activities on battery packs and modules. Provide regular reports on verification and validation activities. Collaborate with Product Development, Battery Systems, and Mechanical Engineers. Support multidisciplinary teams across Manufacturing, Battery Assembly, Purchasing, and Logistics.

What skills do you need to be a battery engineer?

Requirements: Experience in designing and executing integration, verification, and validation test plans. Ability to work across multiple disciplines (engineering, software, manufacturing). Advanced CAD software knowledge (preferably Catia or Solidworks). Strong understanding of Lithium-based battery cells and systems.
