

How long does a Yutong EV battery last?

According to the company, the new long-lasting EV battery has zero degradation through the first 1,000 cycles. The new EV battery pack, made with CATL, has a 932,000 mile (1.5 million km), 15-year warranty. Yutong calls the long-life battery an industry first.

Is a long-life battery an industry first?

Yutong calls the long-life battery an industry first. The bus manufacturer introduced another battery with a 10-year and 621,000 mile (1 million km) lifespan. CATL and Yutong first established a ten-year partnership in 2012 to jointly develop commercial vehicle batteries while exploring new tech and materials.

How long does a car battery last?

These incredibly high cycle numbers mean the battery could essentially last 2 million km before it starts to deteriorate. To put that into context, the average Australian car travels around 15,000 km per year so it would take 130 years worth of average driving to reach 2 million km mark.

Will Yutong's new EV battery pack be used in electric vehicles?

Yutong, one of China's largest bus makers, said the new battery packs will be used in upcoming electric vehicles. According to the company, the new long-lasting EV battery has zero degradation through the first 1,000 cycles. The new EV battery pack, made with CATL, has a 932,000 mile (1.5 million km), 15-year warranty.

Does Nio have a long-life EV battery?

After unveiling its battery strategy last month, NIO announced a partnership with CATL to develop long-life EV batteries. The news comes as NIO's first 900V electric drive system rolled off the production line last week, with a five-minute fast charge that can add 150 miles (255 km) range.

How long does a CATL battery last?

CATL's latest battery is warrantied for 1.5 million kilometres, and up to 15 years of operation. To put that in perspective, most electric cars currently on sale have warranties assuring customers that their batteries will not degrade past 70-80 per cent of their original energy capacity over eight years, or 160,000 km.

BYD is launching a new Blade EV battery next year to power its next wave ...

Tech firm CATL has developed a new battery pack that is claimed to give plug-in hybrids as much as 249 miles of electric range.

Leading EV battery maker CATL released its new breakthrough battery pack with up to a nearly 1 million mile (1.5 million km), 15-year warranty. CATL, Yutong launch new long ...

One of the largest concerns is how long the battery life is on an electric car. Generally, electric car batteries last for as long as the rest of the car. But like with your phone ...

There are two factors that influence battery life - the capacity of the battery, and the build quality. Capacity varies by size, but a high-capacity AA battery will have between ...

The good news is that electric cars come with long battery warranties, guaranteeing an acceptable battery capacity of at least 70% of the original specification after ...

Chinese battery-maker CATL announces its newest technology that boasts a massive range and fast recharge times.

Chinese EV challenger brand Nio has proven the capabilities of its new battery technology after completing a 648-mile journey on a single charge. The ET7 used 97% of its battery life during the 648-mile trip

Tests show that the average 10 to 80 per cent charge time for the Short Blade packs is 17 minutes 4 seconds, compared to the 26 minutes of existing Long Blade battery ...

This low-slung and slipper saloon has already proven it can go for more than ...

This low-slung and slipper saloon has already proven it can go for more than 1,000km (including lapping the Silverstone race track) on a full charge of its 100kWh battery, ...

Editor's Note: On October 10, 2024, we updated this guide by adding five new products (all award-winners), re-testing and updating our other award-winners, and expanding our buyer's ...

Characterized by high energy density and long cycle life, ... Ensuring proper temperature control during the charging process can help extend the life of lithium battery packs. Charging technology to extend battery life. ...

The dealer replacement cost for an I Pace battery is £37,500, according to my service centre who have recently supplied and fitted one. I'm a quarter of the way there ...

Leading EV battery maker CATL released its new breakthrough battery pack with up to a nearly 1 million mile (1.5 million km), 15-year warranty. CATL, Yutong launch new long-life EV...

By then grouping the still active modules, they can create an effective new battery pack. This costs the driver less than \$3,000 in Japan, ... Do so and your battery will ...

New research shows adding real-world driving data to battery management ...

The new EV battery pack, made with CATL, has a 932,000 mile (1.5 million km), 15-year warranty. Yutong calls the long-life battery an industry first. The bus manufacturer ...

Once a battery is above 80% of its total capacity, it takes on more stress when being charged, which negatively impacts its lifespan. If you don't need to use the full range of your Tesla, keeping it below 80% charge is ...

Gotion High-Tech has announced its new L600 LMFP Astroinno battery with 1000km of range and 2 million km worth of charging cycles will go into mass production in 2024.
