

Can I install solar panels without planning permission?

If you live in a house with permitted development rights you can install solar panels without planning permission, subject to certain conditions and limitations. These rights may vary based on location and property type, so you must check with your local planning authority.

Do I need planning permission to install solar panels on a flat roof?

Before installing solar panels on a flat roof located on Article 2 (3) land, you must apply to your local planning authority (LPA) for prior approval to assess their impact on the appearance of the site. If the LPA deems the impact detrimental, then planning permission is required.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Can you install solar panels on your roof?

Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today. Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.

Do solar panels need to be sited?

For all installations, the panels should be sited to minimise their effect on the appearance of the building and the amenity of the area.
