

Phnom Penh promotes lithium battery costs

Does oyika offer a battery swap system in Phnom Penh?

OYIKA offers a battery swap system and rideshare vehicles controlled through its mobile application "We started with 10 swap stations in Phnom Penh in July 2019 and offered riders a subscription plan of \$69USD a month which came with an e-motorbike and battery swap plan, enough to travel 1500km a month," says OYIKA President, Carl Wong.

Will rideshare bring battery share to rural Cambodia?

Bringing rideshare to rural Cambodia invariably introduces battery share to the rest of the country as well claims OYIKA. Rural communities may operate a battery swap station and the company is going to make it affordable to start such a business.

Can E-motorbikes be adopted in Cambodia?

Electric vehicles offer a sustainable environmental transport solution, and OYIKA is lowering the barriers to electric motorbike (e-motorbike) adoption in Cambodia with its battery share service. OYIKA is a Singapore venture-funded company which started working on a battery share concept for e-motorbikes in 2018.

How many motorbikes are there in Cambodia?

The Singaporean company claims there are more than 5 million registered vehicles in Cambodia, 85% of these are motorbikes, and less than 0.1% of them are electric. In 2019, 640,183 vehicles were registered in the Kingdom, according to the Ministry of Public Works and Transport, and 531,269 were motorbikes.

Is battery share cheaper than petrol?

Battery share, therefore, replaces petrol and thus it is also cheaper. OYIKA claims its battery share solution solves the issues of driver anxiety, battery degradation and upfront capital costs which also act as barriers to the adoption of electric vehicles.
