Battery Icon Set Vector Design. Digital battery hologram on future tech background.

How to save battery life on a camera?

If your camera comes with a viewfinder and Live view option for shooting images, then try to make use of the Viewfinder. It will help you to save a good amount of battery life. But, if you are in a situation which demands Live View, then don't hesitate to go for it. But, make sure that you use it only when needed.

How to get more battery power to a camera?

Another option to get more battery power to the cameras is to use an external battery grip. Some cameras allow you to connect an external battery grip to the bottom of the camera body to extend the battery power. So, if you feel that you want to capture more shots, then you can buy an external battery grip.

What happens if a camera battery is fully charged?

There will be a drastic reduction in the number of shots per charge. For example, if the camera manufacturer claims 500 shots for a fully charged battery with that particular camera model. After the lifetime of the battery, the number of shots may come down to 100 or 200. It will take more time for charging.

Do digital cameras have a rechargeable lithium-ion battery?

Nowadays, most of the digital cameras, be it a DSLR camera or a point and shoot camera comes with a rechargeable Lithium-ion battery. What is the Life of a Lithium-Ion Battery? Even though the rechargeable Lithium-ion batteries last for an extended period, it doesn't mean that it will last for the entire camera life.

When should you get a new battery for a camera?

For example, if the camera manufacturer claims 500 shots for a fully charged battery with that particular camera model. After the lifetime of the battery, the number of shots may come down to 100 or 200. It will take more time for charging. The battery operation becomes unreliable. So, its time to get a new battery. 1.
