Please buy environmentally friendly batteries

Are rechargeable batteries good for the environment?

Also, rechargeable batteries offer an alternative to single use batteries, which are bad for the environment when discarded. When it comes to batteries, switching to rechargeable batteries is the sustainable way forward. Eco-friendly customers should do their research to find the best rechargeable batteries to limit their environmental impact.

Are rechargeable batteries eco-friendly?

Rechargeable batteries are a great way to reduce your carbon footprintas they save on resources by being reusable. Therefore, switching to these batteries should be part of your strategy to live an eco-friendly life. All you need is a suitable battery charger to be able to make the most of your batteries.

What type of battery should I buy?

You can buy AA and AAA lithium batteries (all the brands except Philips, Rayovac and Duracell) but you are most likely to see them as button or coin cells for things like watches. They are more expensive than alkaline batteries. Disposable zinc air batteries are a popular choice.

Which rechargeable batteries are recycled?

In a step forward since our last battery guide, three brands of rechargeable batteries now get an extra half a Product Sustainability mark for using recycled content: Energizer: 15% recycled content in AA and AAA rechargeable batteries and 7% in C, D, and 9-volt. Varta: 21% recycled content in Recharge Accu Recycled AAA and AAs.

Are GP recyko rechargeable batteries sustainable?

Rechargeables are highly effective in reducing your carbon footprint, as one rechargeable battery can replace thousands of single-use batteries. GP ReCyko rechargeable batteries go one step further by using more than 10%+ recycled materials in their construction, while over 94% of the entire battery pack, including the box, can be recycled.

What types of batteries are covered in this guide?

This guide covers household batteries like AAs and AAAs, as well as button cells and hearing aid batteries. It does not cover lithium-ion (Li-on) battery packs for laptops and mobile phones, or car batteries. All the brands also make powerbanks and battery chargers for rechargeable batteries.

Are Eco-Friendly Batteries 100% Sustainable? No battery is 100% sustainable--not yet, anyway. Traditional lithium-ion, solid-state, and flow batteries still require ...
