

Qatar aluminum battery processing project bidding

What does Qatar's aluminium smelter project entail?

The smelter project and its associated power plant is in line with Qatar's strategy to diversify the use of its natural resources, by establishing basic industries in the country with the potential to develop value-added metallurgical and manufacturing industries downstream of the aluminium plant.

What is Qatalum power plant contract?

The signature of the Power Plant Contract is a major milestone in the development of the new aluminium smelter in Qatar. Qatalum will be a state-of-art installation with the capacity to produce 585,000 metric tonnes of high-quality aluminium products for the export market, including the GCC region.

Will Qatalum be the largest aluminium smelter ever built?

Once developed, Qatalum will be the largest facility of its type ever built as a single project. In the design of the new smelter, the owners have already contemplated an expansion to double the capacity of the plant to produce 1.2 million metric tonnes of aluminium per year.

The process design capable of meeting the performance criteria as specified including any licensing required. Fabrication and erection of all equipment and their supports; ...
