

# Questions and Answers about Rooftop Solar

Are solar roofs better than solar panels?

While solar panels are stand-alone systems placed on the roof, solar roofs offer an integrated system that includes the solar system and the roof. That's why solar roofs can cost more than solar panels in most cases. But they also have many advantages.

Is my roof suitable for a home solar system?

To determine if your roof is suitable for a home solar system, there are several factors to consider including roof orientation and slope, available roof space, roof age, and shading. When evaluating a roof, one of the first things to consider is the orientation of the roof. At least some part of the roof should be facing the sun.

What questions do you ask about solar panels?

Here are your most common questions answered. Feel free to submit more and we'll add them to the list! Solar Basics How much do solar panels cost? How long do solar panels last? Can't I just get a ball-park price online? Roof Related Questions Is my roof suited for solar? Do I need to have the roof renewed before the solar panels go on?

What is a solar roof?

In short, a solar roof is a roofing system that integrates PV cells into the roofing material, to generate electricity from solar energy. Solar roofs look like traditional roofing materials which makes them a "2-in-1" solution - a protective barrier that also generates clean energy.

Why should you choose a solar roof?

Solar roofs act as a protective barrier for you, your loved ones, and your home. They offer a 2-in-1 solution - you have a new roof and a solar system all at the same time. Although they cost more than solar panels, they increase the value of your home. Plus, they increase the lifespan of your roof.

Do solar panels generate electricity on a south-facing roof?

Solar panels generate most electricity when they're on a south-facing roof that's sloped at 41° and isn't shaded. It's one of the first things our surveyors look at when checking your home's right for solar. A good surveyor can talk you through how the panels' position on your roof will affect their performance.
