

Repair solar high voltage distribution cabinet

How does Horan power engineering's high voltage control room work?

Horan Power Engineering's high voltage control room works to high voltage rules and systems that would be familiar to most distribution network operators in the UK. We see no need to 'water down' the safety standards for high voltage working in the renewables industry.

What does a high voltage control room engineer do?

Experienced engineers in the high voltage control room check and approve all switching operations (both planned and unplanned) and provide a safety net that allows Senior Authorised Persons to operate safely in the field.

What is a high voltage control room?

The high voltage control room is the hub from where we manage the training and appointment of all high voltage staff, review and approve switching procedures for pre-planned works and provide technical support and emergency support.
