

Can I replace the battery with a bigger battery?

No problem you can replace the battery with the same model but bigger size. OP, did you ever go through with this? Hi, upgrade to higher capacity battery depends upon system specifications. 42wh battery is smaller in length and 56wh is bigger so please check your system.

Should I replace a laptop battery with a higher capacity?

I would not recommend replacing a laptop battery with a higher capacity than what it shipped with. In order to meet compatibility requirements the battery get larger physically to increase the capacity, this goes poorly for a number of reasons. You aren't making an equal sized battery that is compatible with laptop, and it has a larger capacity.

Is it possible to make a bigger battery for a laptop?

You aren't making an equal sized battery that is compatible with laptop, and it has a larger capacity. So the answer is you could probably find something if you looked hard enough, but I would say it's an AWFUL idea, and you do this at your own risk.

Can I replace my laptop battery with a higher mAh battery?

If your laptop is running low on battery power, you may be wondering if you can replace the battery with a higher mAh (milliampere-hour) battery. The answer is yes, in most cases you can replace your laptop battery with a higher mAh battery. However, there are a few things to keep in mind before making the switch.

How do you replace a laptop battery?

Most laptops use lithium-ion batteries, which are easy to replace. Just follow these steps: 1. Shut down your laptop and unplug it from any power source. 2. Remove the battery cover. On most laptops, this is located at the bottom of the device. 3. Find the retaining screws that hold the battery in place and remove them with a Phillips screwdriver.

Should I upgrade to a higher capacity battery?

Hi, upgrade to higher capacity battery depends upon system specifications. 42wh battery is smaller in length and 56wh is bigger so please check your system. If you have only M.2 SSD storage and without Hard drive then there should be empty space available to fit extra large battery. Don't buy 56wh battery without checking the system physically.
