Can solar power be sold back to the grid?

One solution which homeowners can benefit from is selling power back to the grid. With the aid of innovative solar technology and government payment schemes, solar panels are now more sustainable than ever, as no clean energy goes to waste.

Can you get money from solar panels?

As a homeowner with solar panels, you may be able to receive payments for any excess solar energy you send back into the grid. Since 2019, the government has backed various schemes to help those who produce renewable energy, to benefit from sending their surplus into the national energy supply.

How much money can you make selling solar?

There is potential to earn between \$80 - \$170 yearly, if you choose to sell solar back to the grid. However, this amount can vary greatly depending on the size of your system and the tariffs offered by energy suppliers.

Should you store or sell unused solar energy?

There are several benefits to storing or selling unused electricity generated by solar panels. These options allow homeowners to make the most of their solar energy systems and earn money through net metering or feed-in tariffs.

Do solar panels generate unused electricity?

However, not all this energy can be collected, and solar panels often generate unused electricity. One way to address this issue is to store excess electricity in solar batteries for later use. This can be particularly useful for off-grid applications or when there is little sunlight.
