

What is a solar filter?

Solar filters are made from specialized materials that effectively block harmful ultraviolet (UV) and infrared (IR) radiation while allowing a tiny amount (0.00001%) of visible light to pass through. Solar filters are essential.

Why do I need a solar filter?

Solar filters are essential. Our closest star, the Sun, is so bright that unfiltered sunlight can permanently damage your eyes and your telescope's optics unless both are adequately protected. Celestron EclipSmart products use filters constructed of either aluminized polyester film (Mylar) or glass.

What is a Seymour solar filter?

This solar filter is made to thread into a threaded camera lens. The filtering material in the aperture of the filter is made with a polymer that is .002" thick. It is strong and durable. This filter features an aluminium cell with the Seymour Solar black polymer thin film. This is a great cheaper alternative to the glass ones.

What is a good solar filter?

Its solar filter, like K&F's, offers a 20-stop neutral density effect - and is available in a particularly impressive range of filter ring sizes. Another established filter brand, offering a solar filter with an optical density of 5 - which will reduce exposure by 16.6 stops when photographing the sun.

How do solar filters work?

They block or attenuate nearly all sunlight so you can safely observe solar phenomena such as sunspots, solar eclipses, and planetary transits. Solar filters are made from specialized materials that effectively block harmful ultraviolet (UV) and infrared (IR) radiation while allowing a tiny amount (0.00001%) of visible light to pass through.

What is a high quality sun filter?

These high quality filters are type 2 glass which means you will see an orange/yellow view of the sun. These filters are designed for observing sun spots. These high quality filters are type 2 glass which means you will see an orange/yellow view of the sun. These filters are designed for observing sun spots.

This filter features an aluminium cell with the Seymour Solar black polymer thin film. This is a great cheaper alternative to the glass ones. These films are in the same cell so they also have the nylon thumb screw for added security.

50mm H-alpha solar filter system with B600 blocking filter, for front mounting at telescopes with 2" focuser, and up to 540mm focal length. The LS50FHa H-alpha Etalon filter system with 50mm aperture (no central obstruction) for use on any ...

Solar Pond Filter System Details; Filter Medium: Zeolite or Gravel option: Solar Panel: 8 W solar panel: Filter Box Dimensions: 30 x 22.1 x 16 cm (LxWxH) Pond Size: Small / Low Fish Stock ...

Premium quality full-aperture solar filters. Made using Baader AstroSolar(TM) Material for solar observation and photography. Filter cell constructed from lightweight 18Ga ...

We stock a large selection of high quality film & glass solar filters to fit almost every scope. See the left hand menu where you can select your telescope or your outer diameter measurement to ensure you get the correct filter.

NOTE: This solar filter is designed only for use with the ZWO SeeStar S50. Do not use it with any other telescope. IMPORTANT: Never view the Sun without a suitable Solar ...

Lunt H-alpha Solar Filters. These H-alpha Filters are designed to retrofit your astronomical telescope for observing the sun during the day. Several filter sizes can be matched with an ...

We stock a large selection of high quality film & glass solar filters to fit almost every scope. See the left hand menu where you can select your telescope or your outer diameter measurement ...

Meade assures that all solar filters are tested at specialised labs that are accredited to verify compliance with the ISO 12312-2 safety specifications for solar viewing. Warning : Meade ...

K& F are a well-know low-cost brand of photo filters, and it has brought out a super ND filter that reduces exposure when looking at the sun by 20 stops. We like how it is ...

Solar Filters & Glasses. Our range of CE approved Solar Eclipse Glasses, Solar Binoculars, Solar filters, A4 sheets of Solar safety film and Herschel Wedges are superb for safe views of eclipses, transits and sunspots

A solar filter is an astronomical filter that protects your eyes and equipment from the intense brightness of the Sun. They block or attenuate nearly all sunlight so you can safely ...

A solar filter is an astronomical filter that protects your eyes and equipment ...

Baader Solar Filter Finder Tool - find the fitting Filter for you. Our finder tool helps you find the fitting Baader Solar Filter for your Telescope / Spotting Scope / Binocular / Camera. Easily find ...

Astro Essentials SeeStar S50 Baader Film Solar Filter with Case. Availability - In stock. £25.00 Inc VAT & Warranty. Vaonis Vespera Solar Filter. Availability - In stock. £159.00 Inc VAT & Warranty. Baader Solar Filters for 50mm ...

Solar Filters & Glasses. Our range of CE approved Solar Eclipse Glasses, Solar Binoculars, Solar filters, A4 sheets of Solar safety film and Herschel Wedges are superb for safe views of ...

We sell glass solar filters film & solar lenses for telescopes online - View a wide range of brands here

This filter features an aluminium cell with the Seymour Solar black polymer thin film. This is a great cheaper alternative to the glass ones. These films are in the same cell so they also have ...

Solar Filters Baader ready-made AstroSolar filters; D-ERF Solar Energy Rejection Filters; Kendrick Solar Filters; Polarizer Neutral Density; Solar Contrast Filters; Solar Herschel ...

Solarscope manufacture hydrogen-alpha filter systems for observing the Sun. With one of our filters fitted, the true dynamic majesty of our nearest star is revealed in its full glory. From complex looping magnetic fields to dark ...
