

Who is responsible for a solar project in the UK?

Solar energy is expected to more than double by 2030 and will therefore continue to be a key part of the UK's decarbonisation strategy. The main parties to solar projects will often include the: Developer (employer) - who obtains planning consent and finance for the project. Contractor- who is responsible for building the solar plant.

Who is involved in a solar project?

The main parties to solar projects will often include the: Developer(employer) - who obtains planning consent and finance for the project. Contractor - who is responsible for building the solar plant. Suppliers/manufacturers - who supply key plant and equipment used in the project,including panels,inverters and transformers.

What happens if you sell solar panels to a company?

Often companies involved in selling solar panels to consumers don't treat their customers properly. Sometimes they damage people's roofs while they're installing the panels. Sometimes they sell the entire residential solar system to a company you've never heard of - and that company starts abusing the consumer.

How can solar power companies protect you from fraud?

Every state has laws against fraud, and most states have consumer protection laws that prevent this kind of abuse. We can use those laws to recover your damages. Sometimes solar power companies try to collect debts that aren't owed, or they use abusive practices like harassing calls or charging baseless late fees.

Why do solar power companies lie?

Sometimes solar power companies try to collect debts that aren't owed,or they use abusive practices like harassing calls or charging baseless late fees. Sometimes they will lie to get you to pay bills you shouldn't owe,like promising to repair your malfunctioning system even though they don't actually plan to do it.
