Who benefits the most from solar-powered mobile devices?

Similarly to residential solar systems, the people who benefit the most from solar-powered mobile devices are those who have no access to electricity. African countries count the lowest numbers of people with electricity, and yet millions of people still use cell phones.

Can solar panels be used on mobile devices?

The latest innovations in solar energy, such as the introduction of flexible panels, have made it a much more versatile technology that opens up a whole world of applications. Applying solar panels to mobile devices would have the obvious benefit of removing (or lowering) the need for wall chargers, but the technology is not quite there yet.
