

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Do solar panels need planning permission?

In most cases, solar panels mounted on a roof or wall of a private house do not require planning permission as they would normally fall under what is referred to as permitted development rights. There are a few conditions that apply if the requirement for planning permission is to be avoided.

Can you install solar panels on your roof?

Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today. Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

How many solar panels can you have in the UK?

What's the maximum number of solar panels you can have in the UK? Assuming your property doesn't require planning permission for a solar installation, there is no legal maximum number of solar panels that you can install on your roof in the UK. Other than usable roof space, there is nothing limiting how many solar panels you can put up there.

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system.
