

Solar power supply does not light up green and turns red

How do I know if my solar panels are generating?

Check the Total Generation Metre (TGM). If there's a solid red LED then there is grid power to the TGM but nothing is being generated. If the TGM's Red LED is blinking then the system is generating. The rate of the blink is determined by the power the panels are generating.

Why are my solar lights not working?

Lights Aren't Working: First up,if your solar lights just aren't lighting up,there could be a blockage. Dirt or debris might be covering the solar panels,preventing them from charging. Cleaning them off is a good first step,but if that doesn't fix the issue,resetting the lights might be necessary.

How to fix solar light not working?

It's a simple trick to clear out any small glitches that might be messing with your light's performance. Here's all you need to do: Turn off the light,count to a few seconds,and then switch it back on. This quick reset often fixes those pesky little issues and gets your solar light running smoothly again. [How to Fix Solar Lights Not Working?](#)

Why is my solar panel blinking?

Solution: Dirt,dust,or mudmay be on the solar panel,therefore it cannot absorb the sun's energy and charge the batteries. On some models the lights may blink because the DAY/NIGHT sensor is built into the solar panel. Clean the solar panel with a non corrosive cleaner to resolve this problem. Why is my solar inverter screen blank?

If the inverter screen is blank,is it dark outside? Most inverters won't liven up unless your solar panels are generating. If there is enough light outside for the panels to generate and the inverter screen is not showing anything then there's a good chance there's no grid supply to the inverter.

Why is my solar panel not charging?

Another issue could be the solar panel is dirtyand not producing the required power to charge the batteries fully. This is a simple fix and one of the easiest things to check. Look at the solar panel and see if it is dirty,then follow steps on cleaning the solar panel and see if that helps the system function properly.
