

Harness the power of bacteria to clear your water. Pond biological filter media works by using ...

The check valve is best placed up by the rim of the tank. Finally you can plug the filter into the air pump - just make sure that the air pump is pumping air through the sponge ...

The Solar Water Purification System is aimed at conceptualizing and developing a solar-powered water purification solution that is cost-effective and compact, offering clean ...

A concept patented in 2010 in partnership with PHAESUN, an expert in off-grid power supply, BIO-SUN is easy to use and totally autonomous thanks to its photovoltaic panels. The terminal ...

Fluval BIO-FX is a premium biological media designed for use with aquarium filters of all sizes! Now available in two sizes - 2 L and 5 L - and featuring a deep pore structure with ...

Zeolite is ideal for ammonia removal in aquariums and pond filters alike. With a micro porous structure known as a "molecular sieve" Zeolite is full of countless tiny holes the size of molecules. They can hold on to a whole range of other ...

Harness the power of bacteria to clear your water. Pond biological filter media works by using its surface area to produce and house bacterial colonies that feed off nitrates and phosphates, ...

A solar-powered pond filter with a battery backup works by harnessing energy from the sun to power a water filtration system designed to keep a pond clean and healthy. The addition of a ...

Aquarium biological filter media is either natural or synthetic media that has been specially designed to harbour the beneficial forms of bacteria that remove toxins from water. The most ...

The combination of highly effective biological filtering with Hel-X and mechanical/biological cleaning with filter sponges ensures healthy and clear aquarium water. The BioMaster is ...

Free delivery and returns on eligible orders. Buy AQQA Aquarium Double Sponge Filter, 3W/5W Quiet Electric Power Fish Tank Filter, Submersible Foam Filter with 4 Sponges, 1 Bag of Bio ...

Solar pond filters are the environmentally friendly way to clean your pond water. These pond filters are submersible and are used to house a solar pump, creating an eco-friendly pond ...

In the summer of 2022, we introduced you to the ARTi's Solar Powered BioFilter. This innovative technology

utilizes biochar to improve the water quality of lakes or ponds while also producing ...

If you are looking for a solar pond pump that is very easy to install and can provide you with various custom features, the PowerEZ Solar Water Pump Kit is one of the ...

Solar-powered membrane-based technologies could have a viable solution to the existing problems in Asia and Africa situated in semi-arid to arid regions. Membrane-based water ...

Small tank filters don't need as much power behind them, but they still need to do just as good a job. ... These can be some of the smallest filters around, good for micro tanks under 20 gallons with maybe just one or two fish in, but can also ...

Modified biosand filters (MBSF) and solar pasteurizers have been used as individual drinking water treatment systems around the world. The aim of this study is to ...

Aquarium biological filter media is either natural or synthetic media that has been specially ...

SuperFish Aqua-Flow submersible internal Filters are a compact, submersible and powerful internal filter with an easy to replace media system Available in a selection of sizes, the filters ...

The BioRotator is a drum filter combined with a continuously rotating biological filter. The key properties at a glance: over 5x more waste substance breakdown by bacteria compared to so ...
