

Why do you need a solar coated windshield?

A solar coated windshield is a great way to keep your car cool while driving and also protect yourself from the sun's harmful UV and IR rays. Windshield with shade bands can help deflect the sun's heat, while frit dots scatter sunlight so that it is not as intense.

Are solar windshields a good investment?

The long-term benefit is savings on fuel. If it is cooler inside the vehicle, there is less need to use the air conditioner, making your car use its fuel more efficiently. Over time, the money you saved on gas could pay for the windshield, making IR glass and your solar coated windshield a good investment.

What is a solar-coated windshield?

A solar-coated windshield reduces the interior temperature of the vehicle and increases cabin comfort. All this is to counter the heat and sun glazing discomfort while simultaneously making the cars stand out. Our post about "Auto Glass: Tempered vs. Laminated - what is the difference?" elaborates on a laminated windshield's manufacturing process.

Does a solar coat keep your car cool?

All that heat reflected back will also keep your leather seats, steering wheel and other plastic parts cooler so you do not burn your skin when moving around inside the car. Plus, you'll beat the glare of the sun. It just takes the installation of a solar coat to provide the shade you desire and keep your car cool.

What is a wanderlust visor?

Our convertible Wanderlust Visor is ideal for a day outside in the sun. It can be worn as a cap, or as a visor by unzipping the top section of the hat. The Wanderlust Visor provides generous sun protection, with a wide brim measuring 9cm at the front.

Are IR glass and solar coated windshields a good investment?

Over time, the money you saved on gas could pay for the windshield, making IR glass and your solar coated windshield a good investment. However, the IR windshields tend to run more expensive than regularly filtered windshields.
